

# Method Statement

## Fitting bronze plaques to a recessed stone pillar

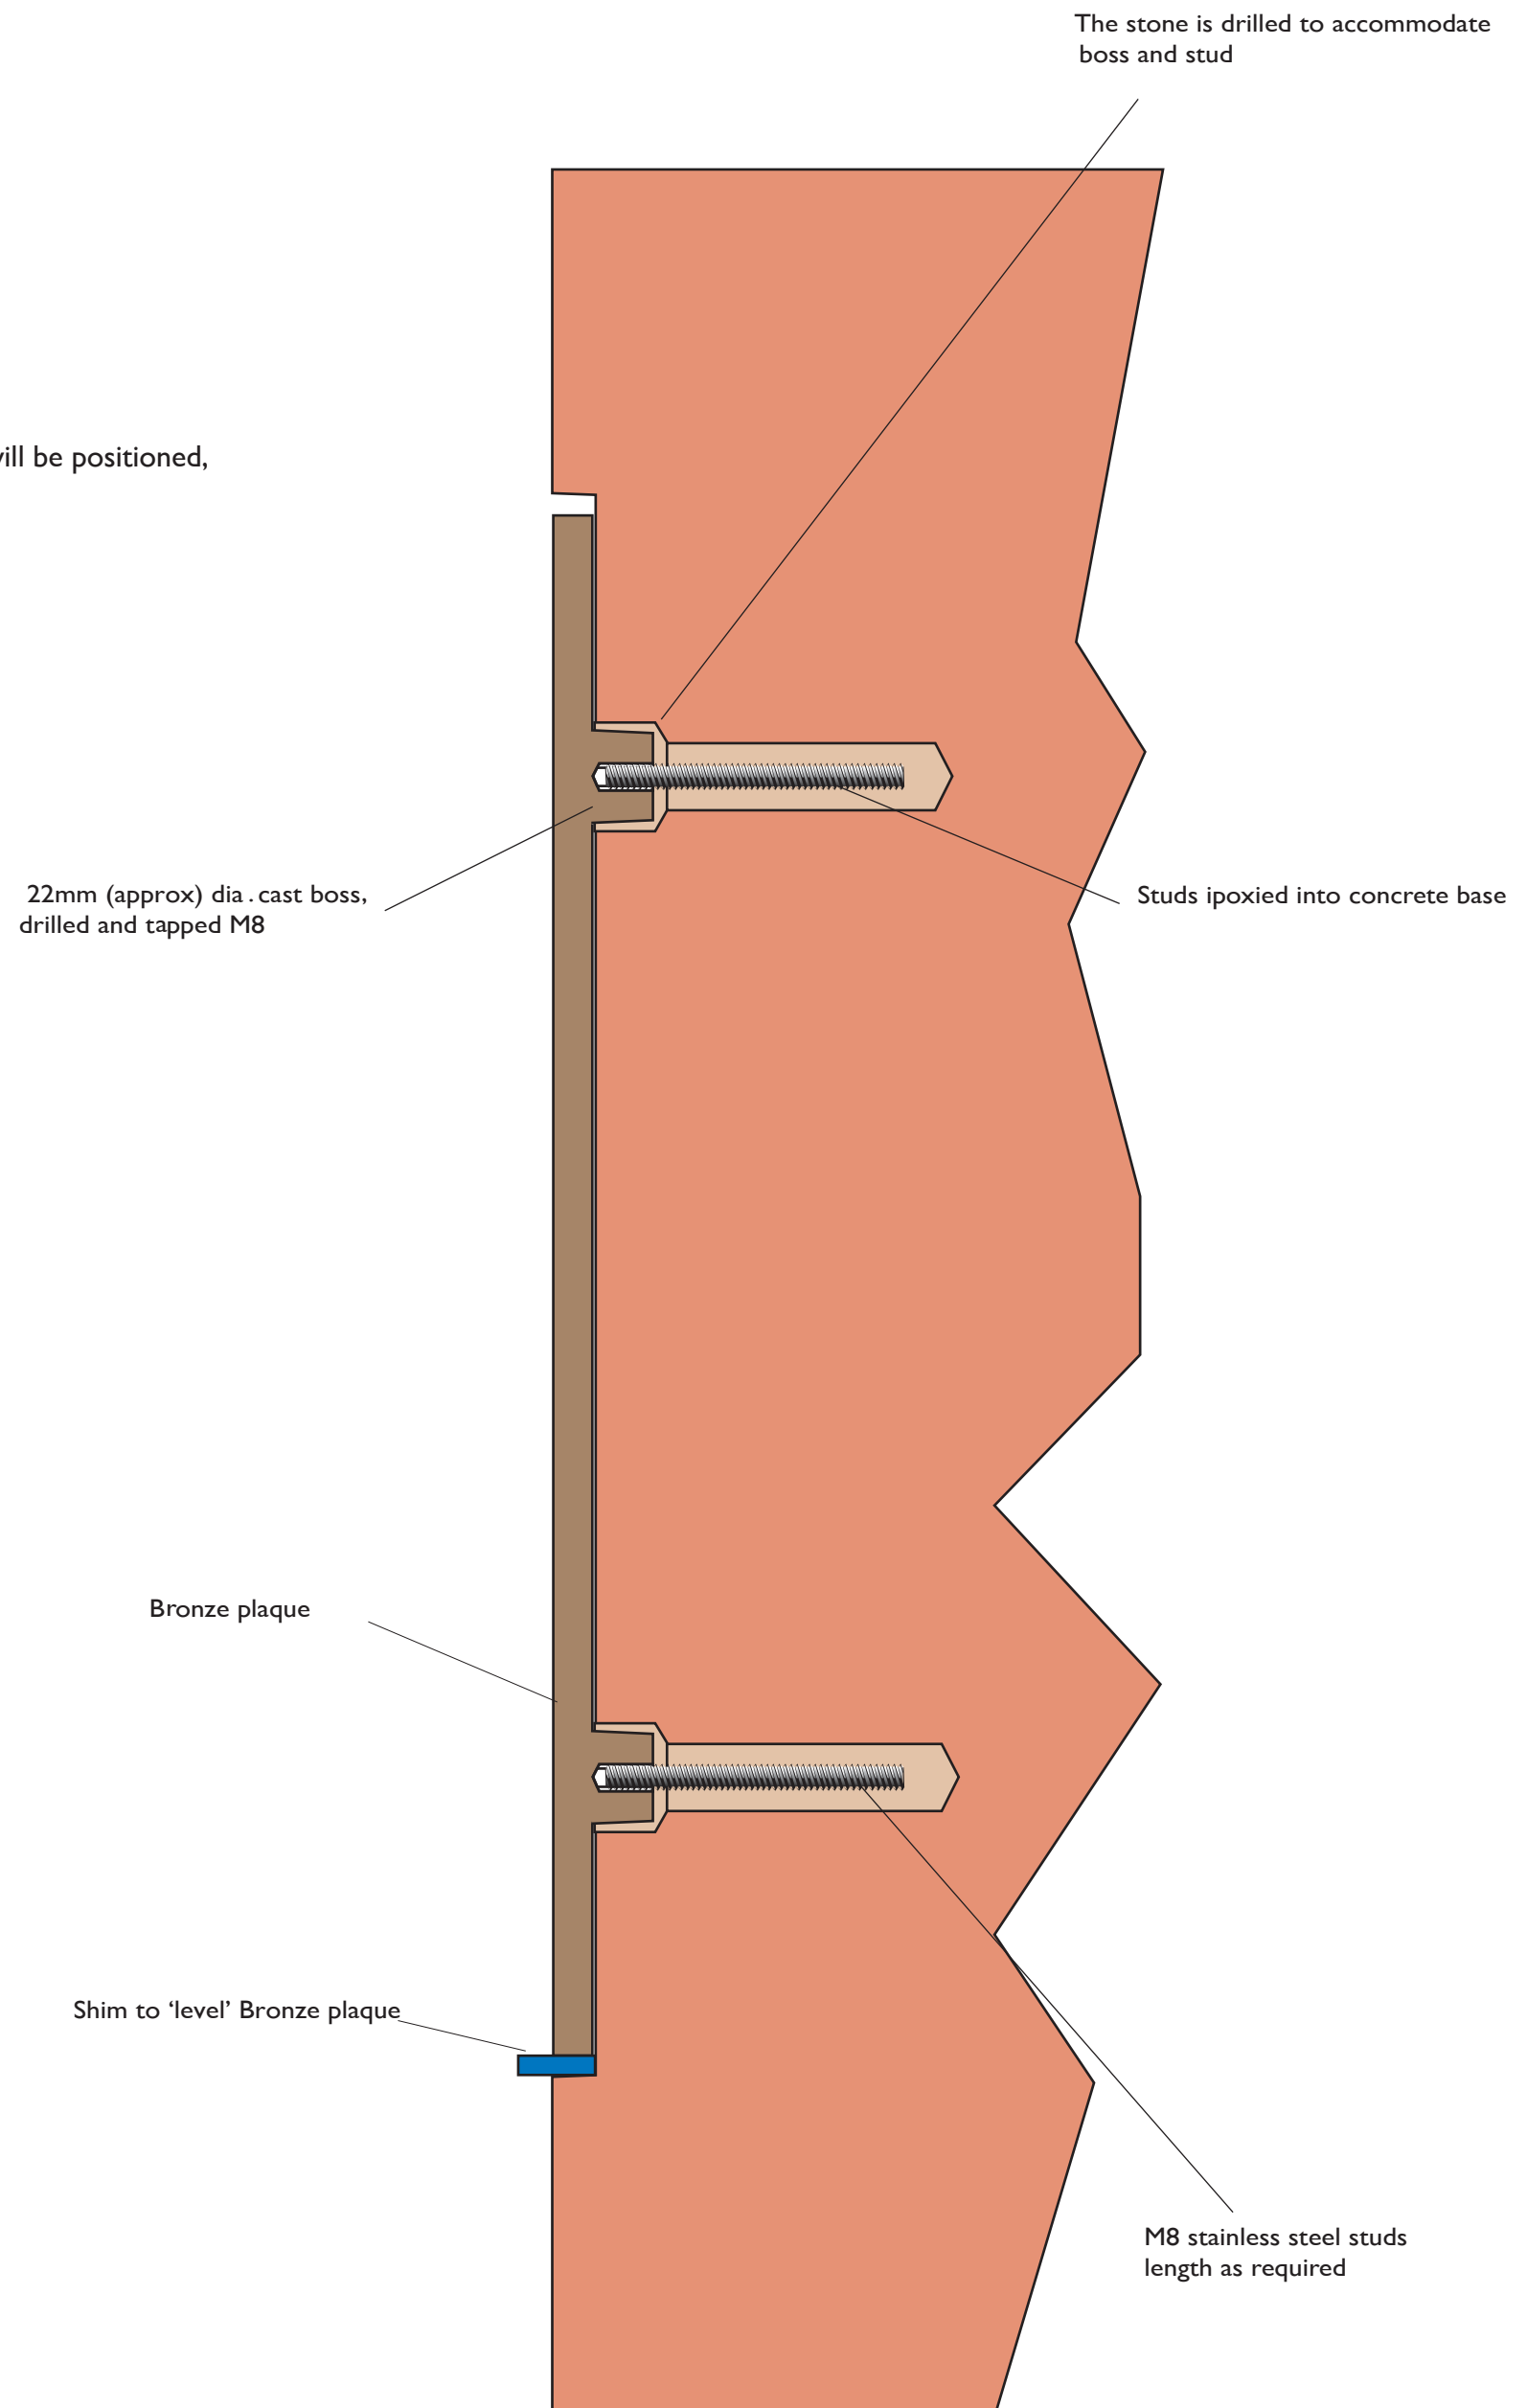

A template will be used to position the bronze plaque and mark the position of the fixing holes.

These will be drilled out to receive the fixing studs and cast bosses and the bronze checked for alignment.

After the holes have been cleaned out, and the bronze checked for fit, the holes will then be filled with rapid setting, 2 pack resin, the bronze will be positioned, aligned and held in position until the resin has hardened.

Clean down as required and remove any spoil.
